

Grand Finalist Global Security Challenge Cyber 2010

London, UK

Oct 14, 2010

Complete network security: 1 dynamic framework and 1 dynamic protocol

Whitenoise Laboratories (Canada) Inc. is proud to have been named a Grand Finalist in the Global Security Challenge 2010 Cyber Security Challenge in London on November 10 and 11, 2010. Security is the top priority for governments around the world as terrorist attacks continue to threaten major cities and economies. Advancements in technology have become critical to ensuring the world's security.

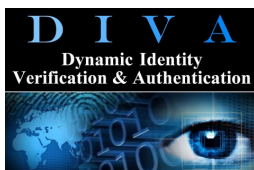

The idea of the **Global Security Challenge (GSC)** was born at **London Business School** in 2005. They knew about the challenges that innovators face in this market, and created the GSC to empower them through the competitions.

The Global Security Challenge belongs to the **OmniCompete** Group. The Global Security Challenge is the pre-eminent global conduit for connecting critical security solutions with the global financial markets and the key global players.

The Cyber Security Challenge is targeted at uncovering tools for detecting, monitoring and visualizing the Cyber Security threat. The technology and products can be used to prevent, defend against, cope with or recover from terrorist incidents and other criminal acts in the digital/online space.
